

# ONE-STOP PD SHOP

## 0. Training Solutions

Your national Professional Development (PD) Committee has been working on ways to more effectively market and deploy NMA PD products. One resultant approach focuses on providing all information available for a particular PD product as a CD file with appropriate hyperlinks to enable a One-Stop PD Shop. By saving these files in a PD folder on their desktop, interested chapter members and PD leads can readily access the information and instructions they need to offer that PD product.

The One-Stop PD Shop consists of nine PD product files on a mini-CD, which can be readily downloaded to your desktop. We urge you to save these files in a PD folder, and to email the associated information to any of your members who may want to take advantage of these PD products. Your comments and improvement suggestions would be welcome as we strive to make NMA PD the best it can be.
