4. E-Learning Self Study

Available 24 hours per day, 7 days a week and 365 days per year, these NMA online courses designed for the individual learner provide an effective learning environment at affordable prices (most courses cost \$79). Associated training includes interactive exercises, real world examples, supportive links and web-references, and focused readings to help the learner quickly retain knowledge. An innovative “Ask the Expert” feature gives learners ongoing support; participants can pose questions about course content and receive an answer from a subject matter expert within 24 hours. Also, a unique dashboard allows companies to track the progress of learners and measure learner outcomes.

All courses have been developed by industry professionals and subject matter experts, are based on content used by world-class companies and can be completed in as little as 4 to 6 hours. Featured programs include Business Communications, Finance, Strategy, Human Resources, Leadership, Management, Management Information, Systems, Marketing, Project Management, Innovation and Critical Thinking. Try them, you will like them.
